

Rice Weed Management: Mississippi State University Row Crops Short Course

Connor Webster, LSU AgCenter

Rice Acres

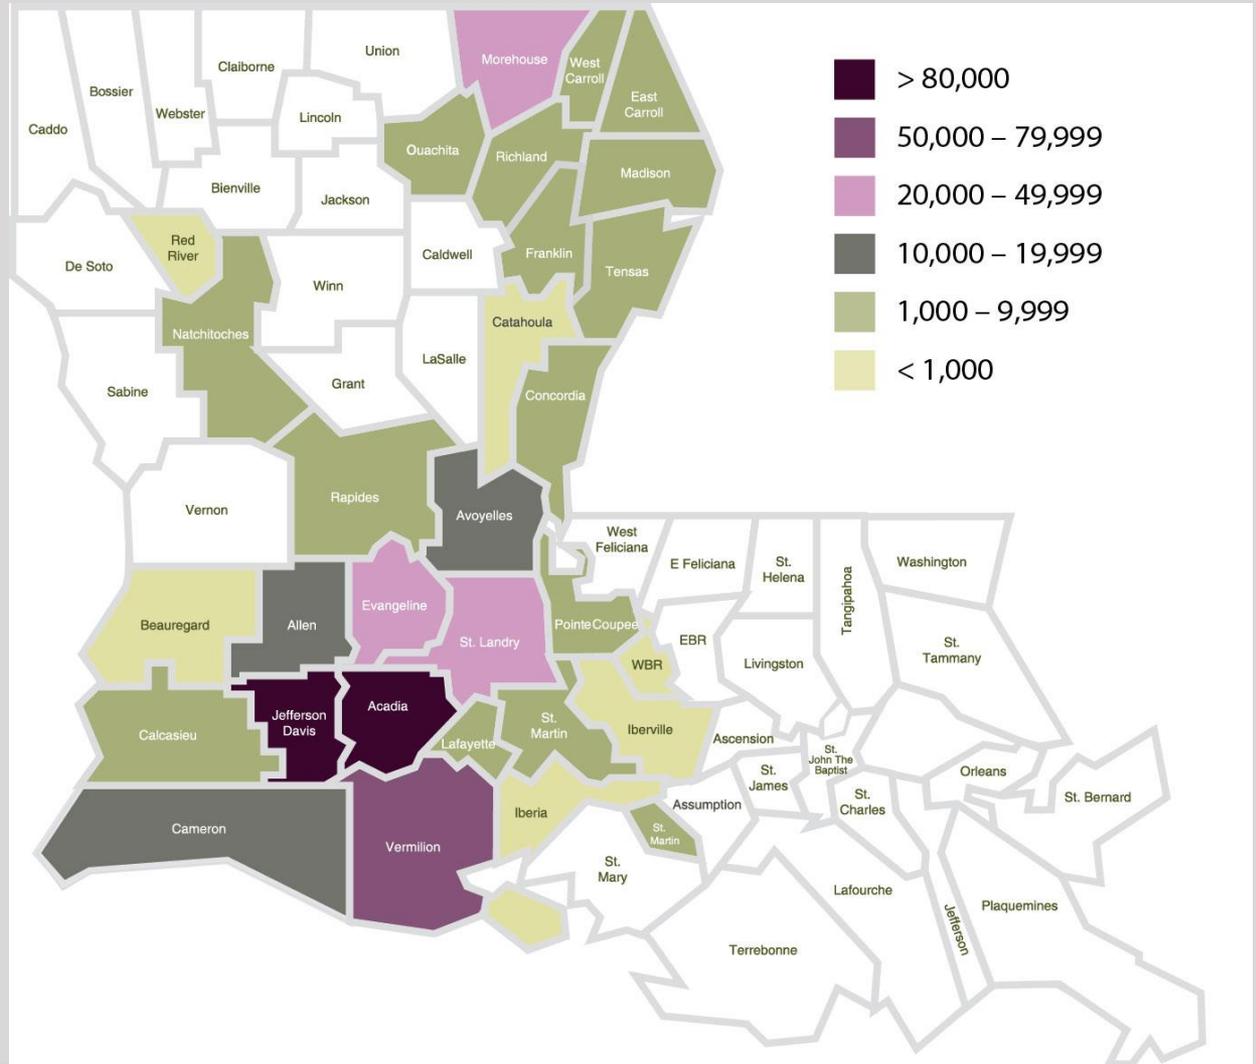

Acreage:

2021: 411,690

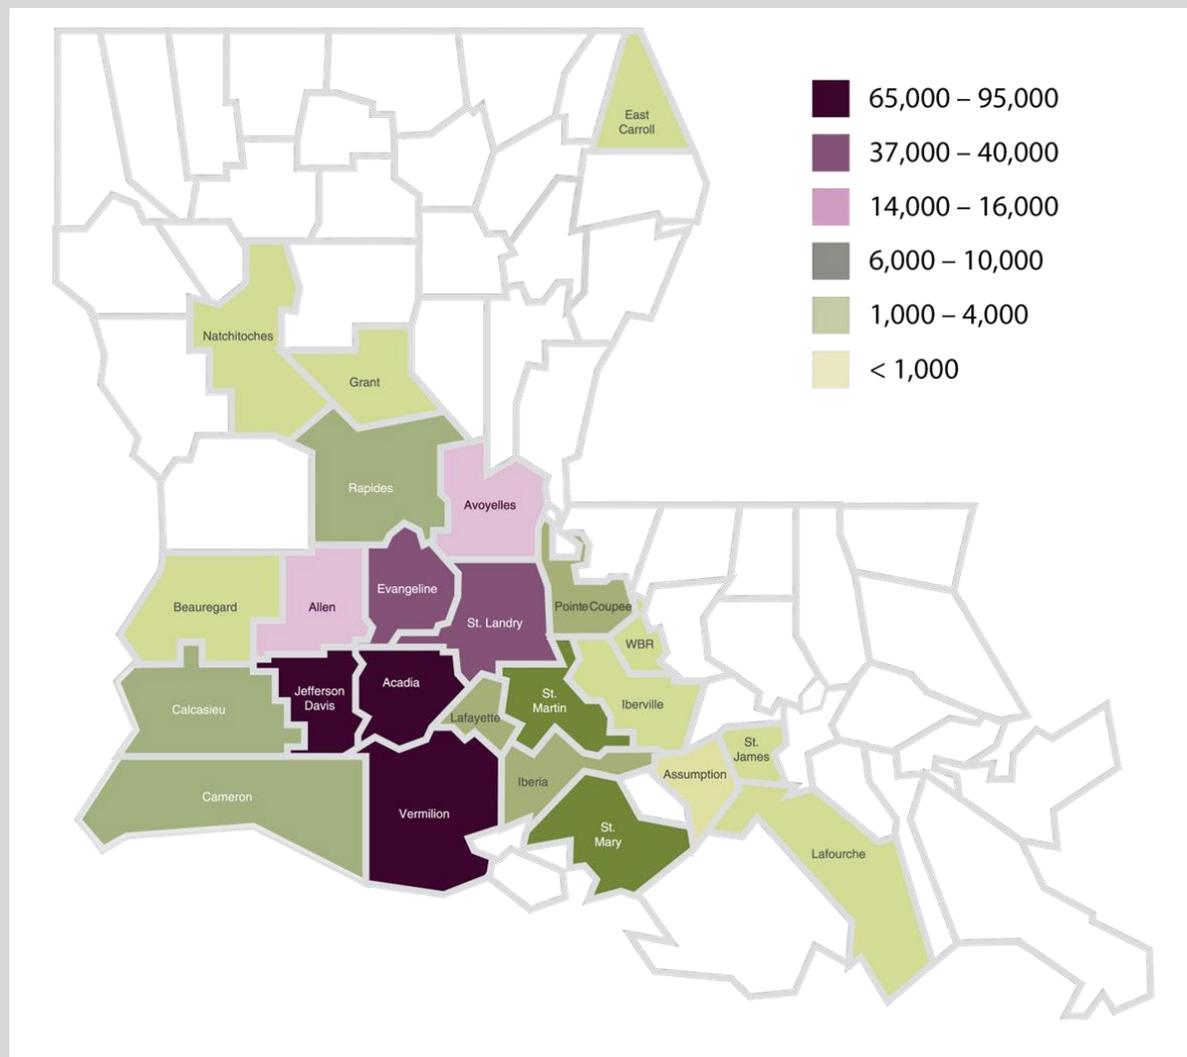

2022: 415,556

2023: 461,371

2024: 459,690

Crawfish Acres

24-25 Projected Acres:
400,000

Rotation and Tillage

Brook paspalum

Perennial barnyardgrass

rice cutgrass

knotgrass

southern watergrass

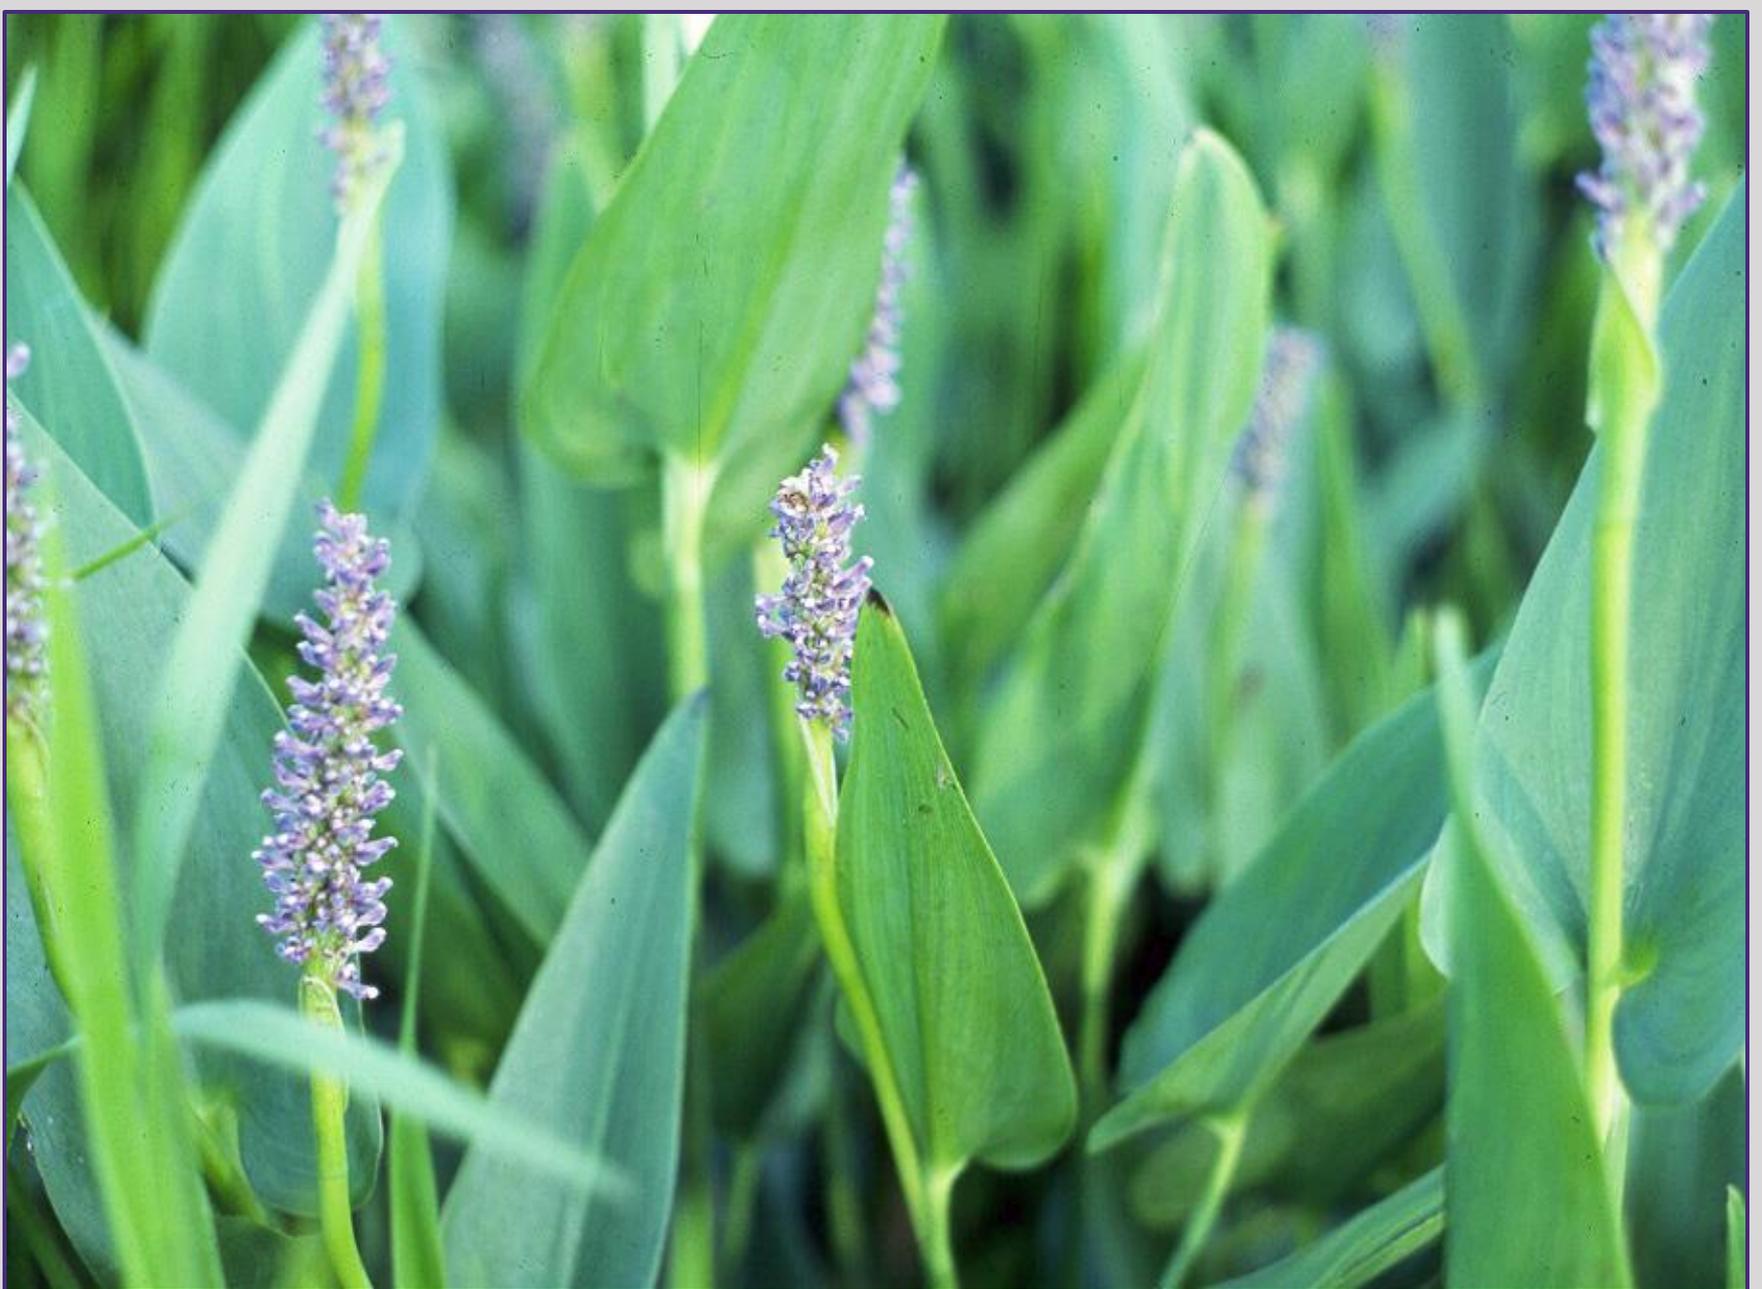

alligatorweed

common arrowhead

grassy arrowhead

pickerelweed

creeping burhead

ducksalad

Loyant Impregnation on Fertilizer

Loyant Impregnation on Fertilizer

- Loyant fits south Louisiana
- Excellent activity on aquatics
- Drift can be an issue
- Must be applied in the water on fertilizer
- Reduction in control can be expected, increase rate by 2 oz

A New Mode of Action Coming to Rice

Tetflupyrolimet - Dodhylex

- **FMC New mode of action: Dihydroorotate dehydrogenase**
 - First MOA since late 90's – HPPD's
 - Group 28

- **Residual grass product**
 - barnyardgrass, Amazon sprangletop, broadleaf signalgrass

- **Some post activity**

- **3 to 8.6 fl oz/A depending on soil type**

- **Benign to rice and most other crops**

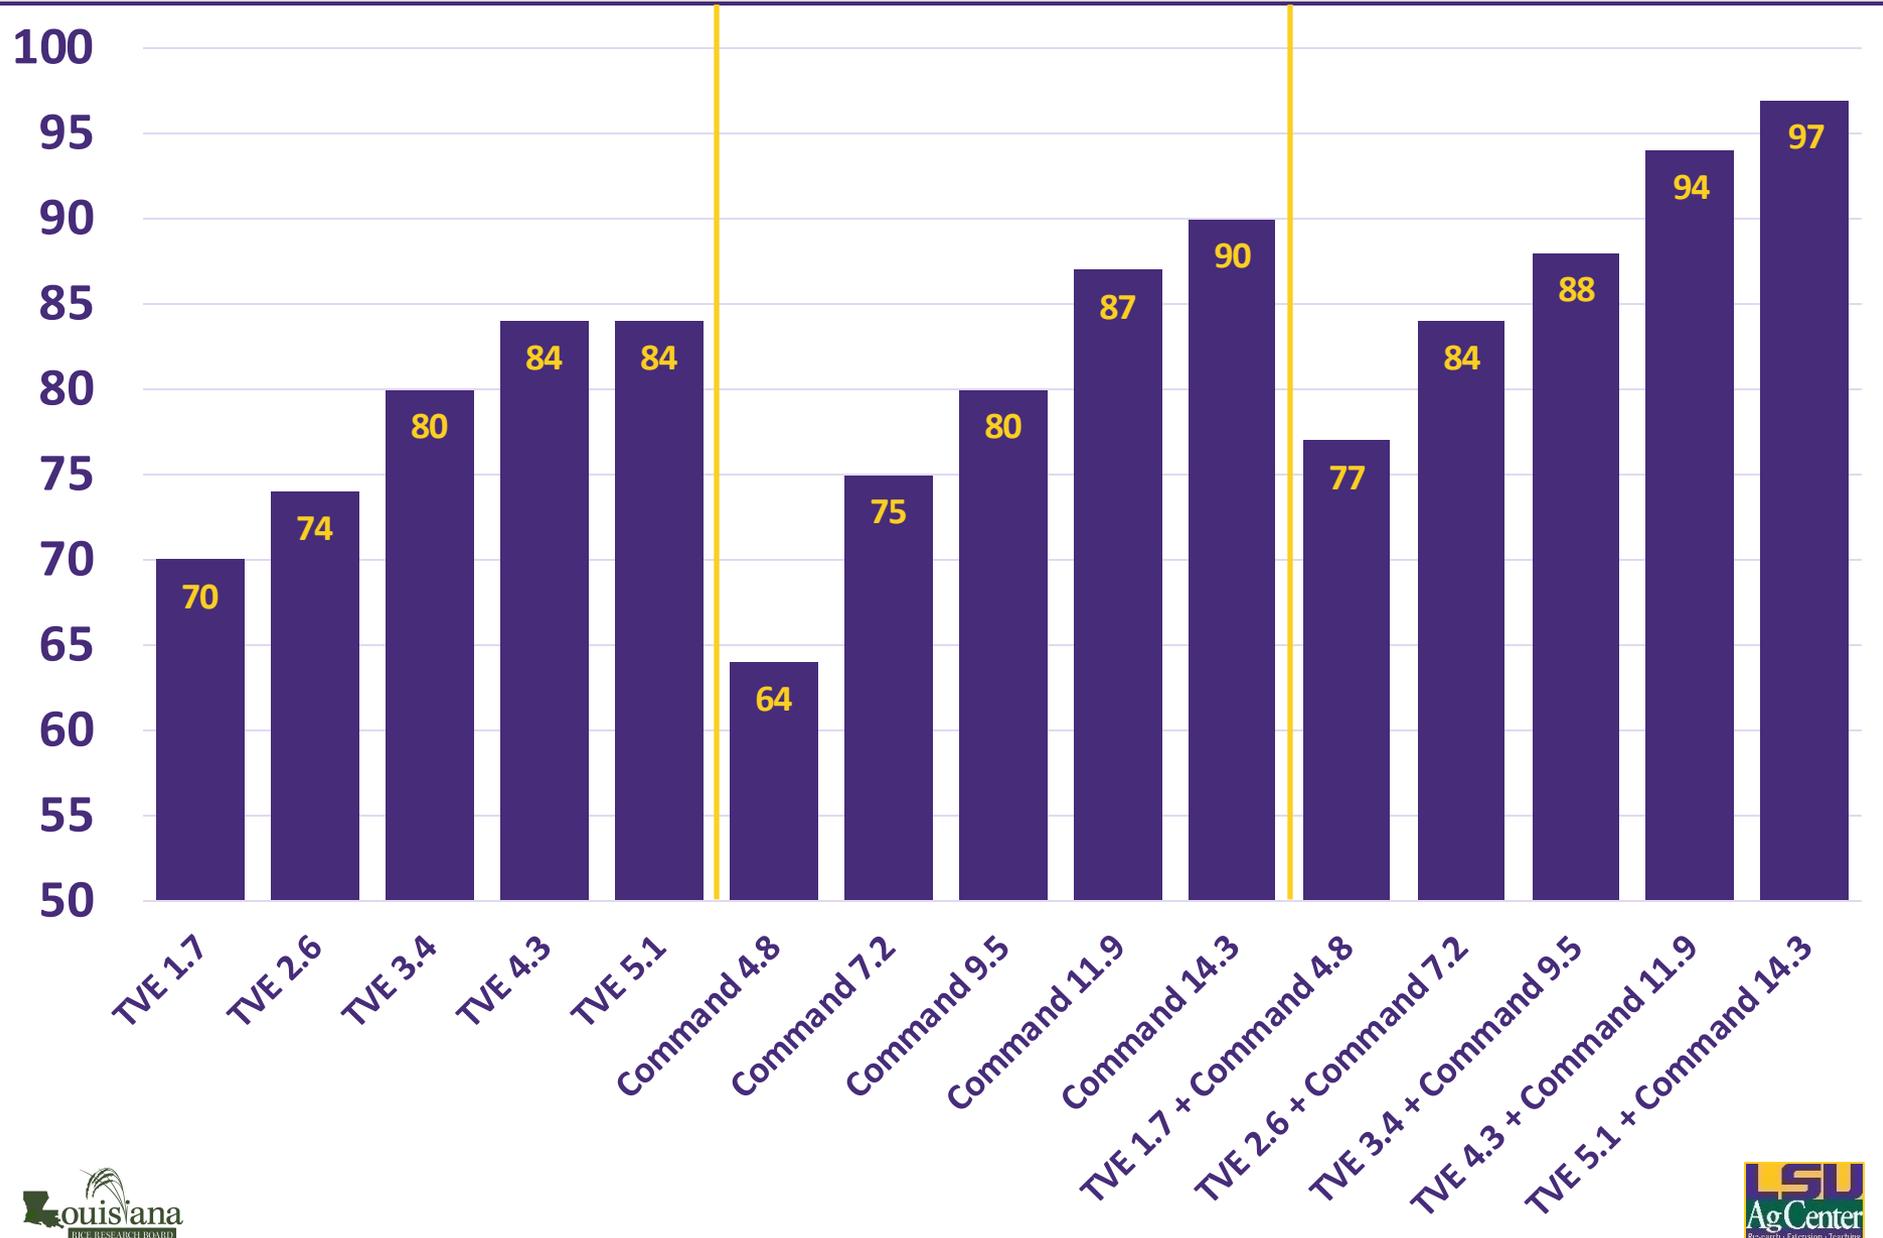

Dodhylex™ active	 COMMAND 3ME <small>TRICLOPYR-POLYTRICLOPYR</small>	Acres covered by case
4.3 fl. oz/A	10.75 fl. oz/A	30A
8.6 fl. oz/A	21.5 fl. oz/A	15A

- **Commercial release as a Co-pack: Likely 2027 growing season**

Provisia Injury

Provisia Injury

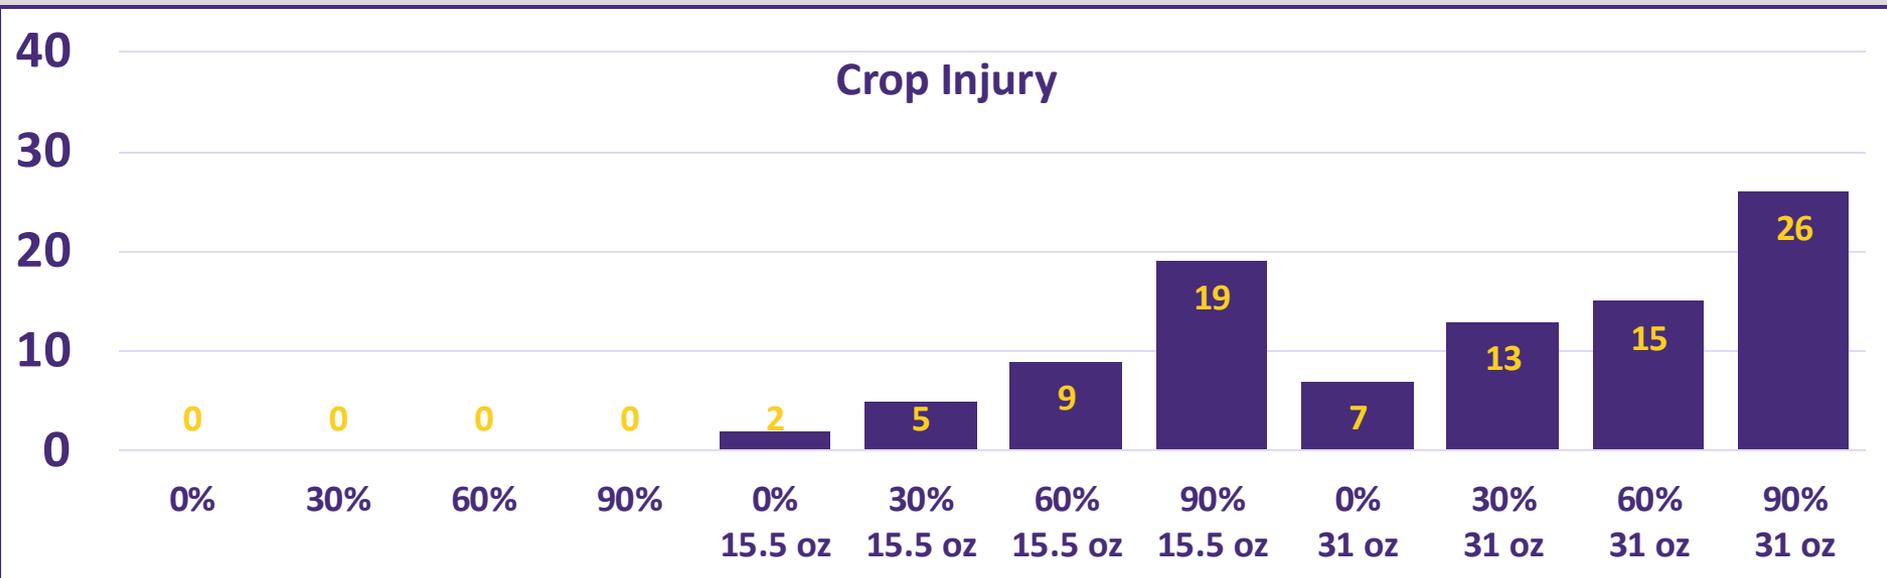

- Provisia injury was an issue in 2023 and in 2021
- Weather related
 - Cold and cloudy weather playing a role

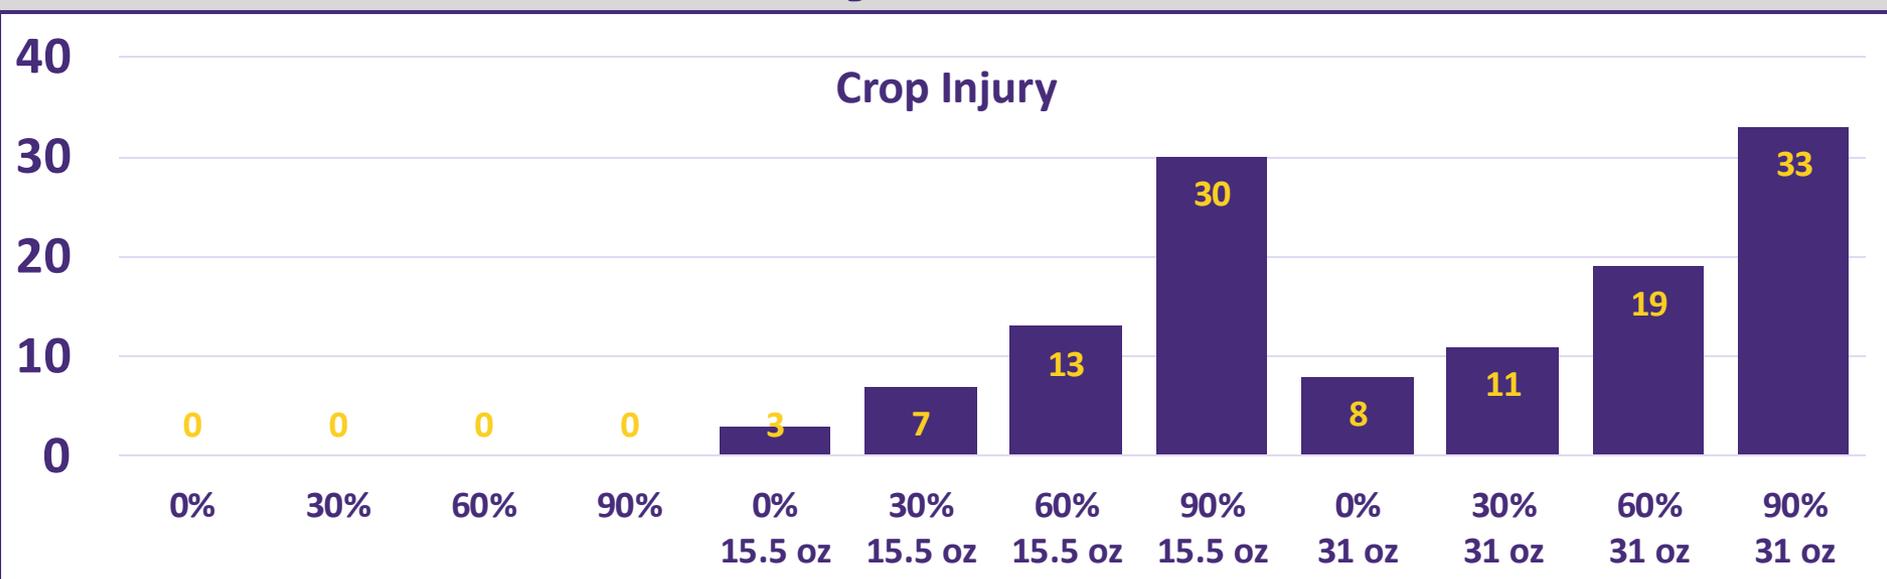

Simulated Overcast Weather Study

Shade 7 Days Before Provisia

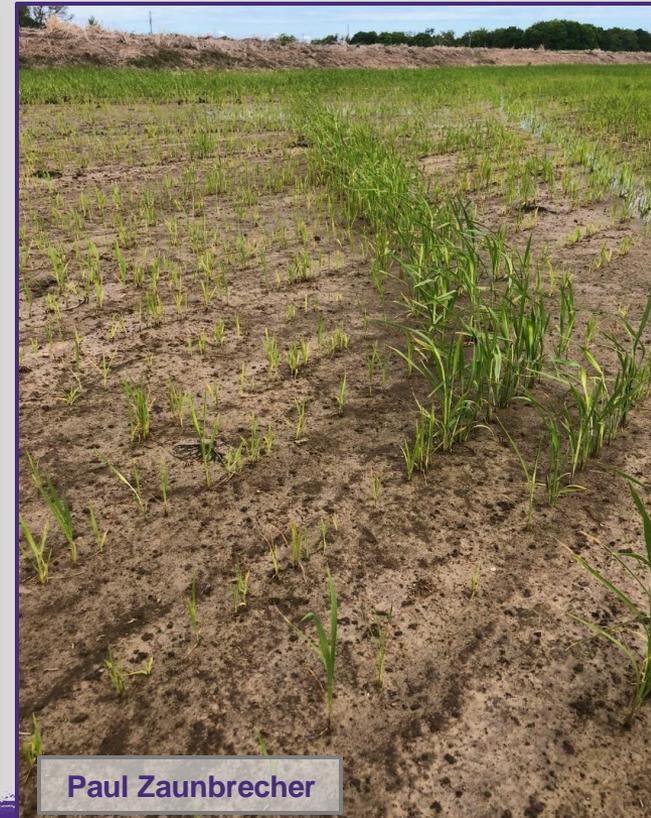

Shade 7 Days After Provisia

Simulated Newpath/Preface Carryover

Newpath/Preface Carryover

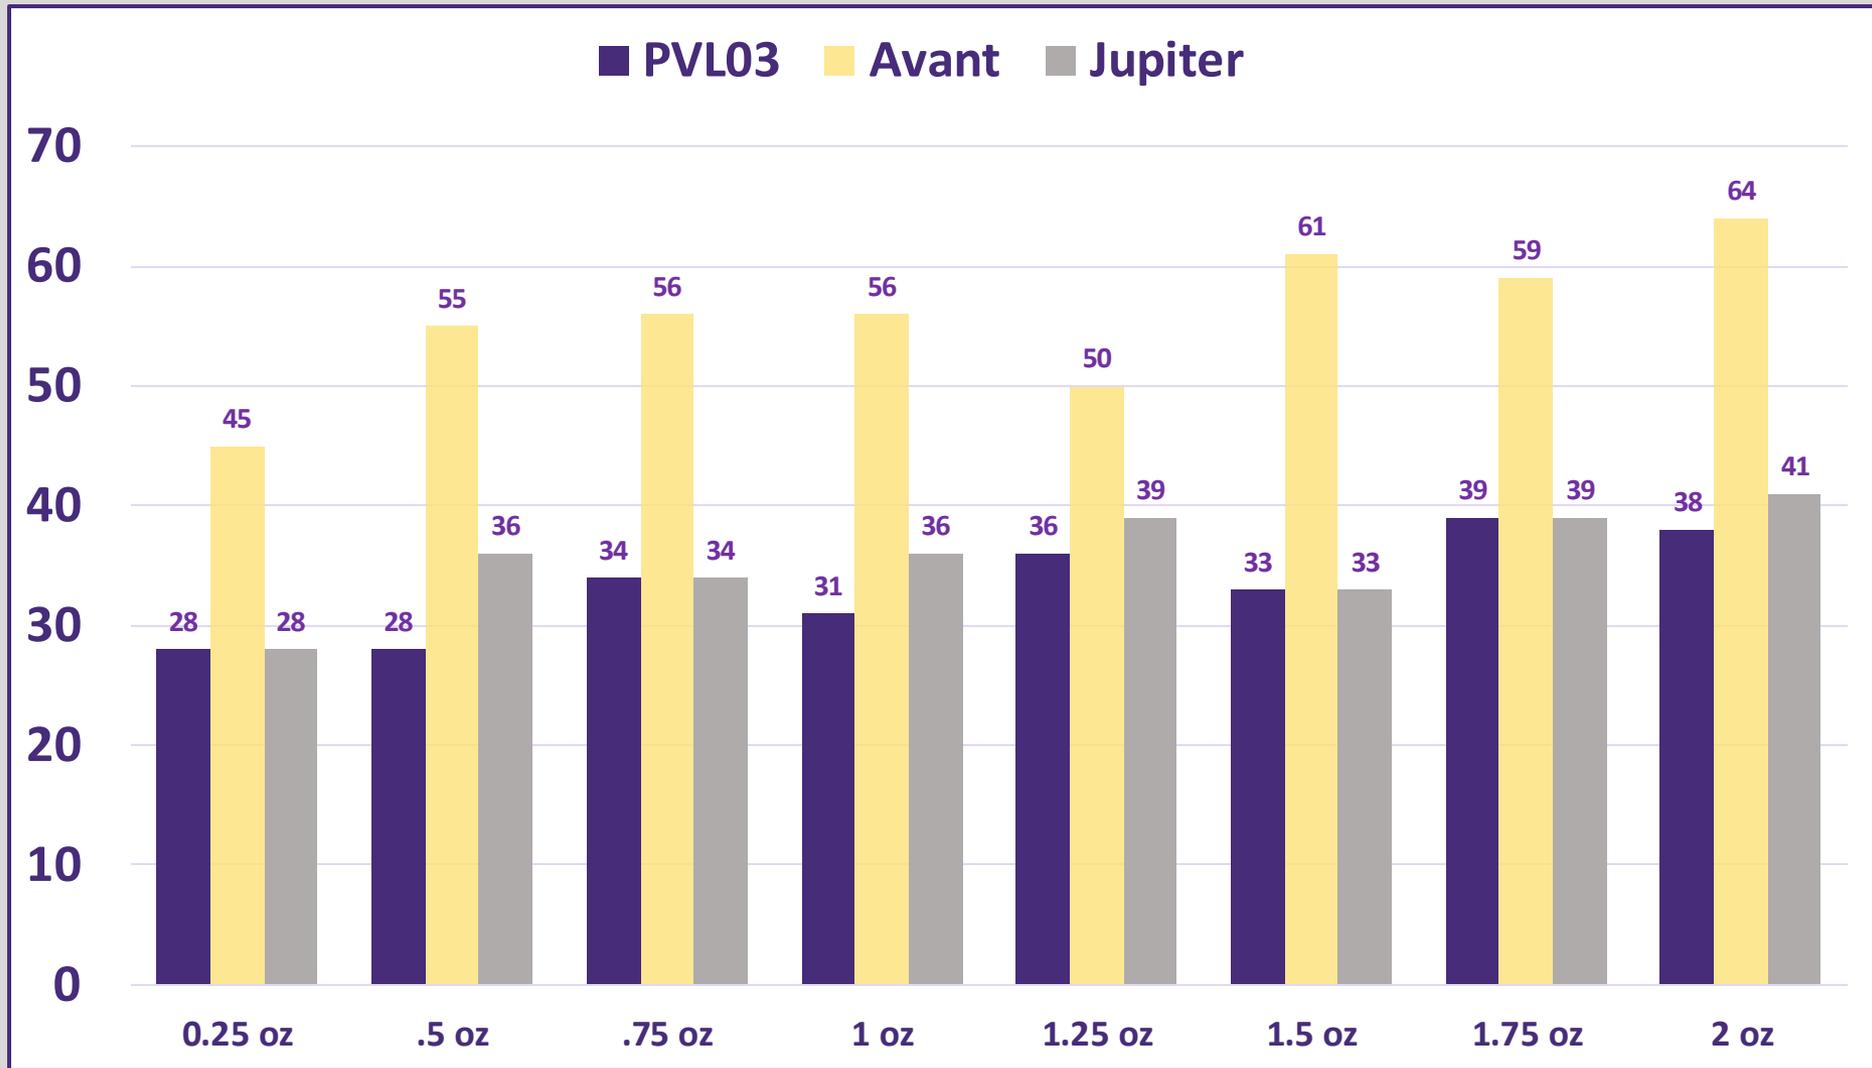

- 18-month plant back to non-IR rice
- Crawfish productions creates an anaerobic environment
